SUMMARY

Fullstack developer with five years building and maintaining production web applications end to end, across healthcare, insurance and SaaS clients, plus two years in application support and defect triage for live consumer platforms on an iOS, Android and browser matrix. Ships features from schema to interface and proves them with end-to-end suites in Cypress and Playwright, running in CI.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, responsive and cross-browser development, accessibility

Backend: Node.js, NestJS, REST APIs, ORM, SQL and NoSQL databases

Testing and QA: Cypress, Playwright, end-to-end and regression testing, defect reporting with reproduction steps and device/OS matrices, triage, cross-platform testing on iOS, Android, browser and Windows

Tools: Git and code review, CI pipelines, Jira, ServiceNow, Intercom, Kustomer

PROFESSIONAL EXPERIENCE

Application Support Technician — Turo

Remote | July 2025 – April 2026

- Reproduced and documented defects for engineering: reproduction steps, device and OS matrix, logs.
- Triage incoming reports, separating client-side misuse from genuine platform defects before they reached the engineering queue.
- Covered iOS, Android and browser daily, exercising the flows that break hardest in production: identity verification, booking and payments.

Help Desk / Technical Support — Alorica

Santo Domingo, Dominican Republic | April 2024 – June 2025

- Bilingual (English/Spanish) troubleshooting across a wide Samsung device and OS-version matrix, isolating reproducible faults from user error.
- Documented every case in the ticketing system and fed confirmed findings back into the knowledge base.

Fullstack Developer — Clix Solution Consulting

Remote | 2019 – 2024

- Built and maintained production web applications end to end for five years, across client engagements including Opensoft Dominicana and Unclick Technologies.
- Built Node.js backends with ORM over SQL and NoSQL databases; handled code review and debugging on existing codebases, not only greenfield work.
- Delivered cross-browser and responsive compatibility work on every release; still maintain client sites across healthcare, insurance and SaaS, including Doktap, Farach Dental, ARS Banco Central and GetWell RD.

PROJECTS

- **Kalenday** (kalenday.com) — developer on an AI communication platform handling WhatsApp, Instagram, email and SMS in one inbox. React SPA over a Node.js backend; maintain the channel integrations carrying live customer conversations.
- **playwright-page-audits** (github.com/mssnzz/playwright-page-audits) — reusable Playwright assertions for defects that ship quietly: broken images, console errors, mobile horizontal scroll, skipped heading levels, window.opener leaks. Each audit tested both ways.
- **manuel Sanchez.io** (github.com/mssnzz/personal-portfolio) — Next.js site using server components, with 38 end-to-end tests across desktop and mobile running in CI alongside lint, types and build.

LANGUAGES

Spanish — native. English — C1, client-ready on calls with stakeholders and clients.
